

ERC Grant Application FAQ

Frequently asked questions

Can I apply for funding if the project has already received funding?

If the proposal adds additional activity/ value to the existing funded work then it is eligible for consideration. If it is a request to provide additional funds to support an on-going funded project it is unlikely to receive sufficient priority for support.

Can I apply for more than one award?

An applicant may only submit one award each round.

The grant scheme is intended to fund the research activity described in the application. Additional funding for the same project will not usually be possible. Follow-on work which builds on earlier funding but expands / asks a new research question will be considered.
